

Accuver

Data-Driven MCX Assurance MCX Solution

Advanced MCX KPI Analysis & Automation Suite

Mission-Critical services cannot rely on assumptions. Accuver transforms complex field and lab data into actionable insights for 3GPP-aligned MCX service assurance.

Real-time Data Acquisition with XCAL

XCAL captures MCPTT, MCVideo, and MCData signaling and media traffic in real time. It logs key service events across lab, field, FRMCS, and NTN-integrated environments.

Deep-Dive Protocol & QoE Analysis with XCAP

XCAP analyzes collected logs across multiple layers to validate service quality, interoperability, latency, floor grant success, and mission-first QoE.

Automated SLA Reporting with XCAP-AMS

XCAP-AMS automates MCX test cases and generates standardized reports for quantitative SLA validation, emergency scenario verification, and real-time responsiveness.
